# Day 11: Assignment - WS Restful

Create rest endpoints for CRUD operations on **Insurance Policy** object with following details.

- ID: Long

- PolicyNo: Long

- ExpiryDate: LocalDateTime

- MonthlyPremium: Double

- CustomerName: String

- CustomerAddress: String

- MobileNumber: long

- CustomerAge: int

- EmailAddress: String

Meet the following validation and Error Messages -

Policy number should be of at least 11 digits

ExpiryDate should be from future

Mobile number validation

Customer's age must between 18 & 60

Email validation

**NOTE**: Send proper Error customized error messages on validation violation.

Use either H2 or MySQL database for persisting data

Use Postman or Talend API Tester extension as API client
